

## 3.6 Evergreen Sequoia Maintenance Notes - September 15, 2021

This maintenance update will keep Sequoia at Evergreen 3.6.4 (the current release) along with some additional bug fixes. Bug fixes that were previously included in prior maintenance updates but that are not yet present in the community release will be retained; this document just lists the new fixes.

### Staff Catalog

- Display improvement for single record result
  - The new staff catalog (Angular) will now honor the Library Setting called “Jump to details on 1 hit (staff client)”. If this Library Setting is set to True and a search in the staff client that has only one bibliographic record in the search results list, then the display will “jump” directly to the bibliographic record instead of showing the single result on the search results list page.

### Curbside Pickup

- Add Curbside Pickup Appointments to Bootstrap OPAC
  - The Bootstrap OPAC will now display curbside pickup appointments in patron accounts if this feature is enabled.
  - <https://bugs.launchpad.net/evergreen/+bug/1895737>

### Holds

- Place Hold button disabled when no holdable copies exist
  - This patch ensures that the Place Hold button in the catalog is disabled if there are no holdable copies attached to the bibliographic record and the user does not have permissions required to place a hold that cannot currently be filled.
