

## 3.6 Evergreen Sequoia Maintenance Notes - January 19, 2022

This maintenance update will keep Sequoia at Evergreen 3.6.5 (the current release), but adds some additional bug fixes. Bug fixes that were previously included in prior maintenance updates but that are not yet present in the community release will be retained; this document just lists the new fixes.

This maintenance update will be applied to your Evergreen Test system on January 19, 2022 to provide time for testing and evaluation. The patches and bug fixes contained in this update will then be applied to your Evergreen Production system during the February 2022 maintenance update.

### Circulation/Bills

- Adjust to Zero now uses Lost and Paid copy status
  - If your library uses the Lost and Paid copy status, using the Adjust to Zero option to clear a bill on a patron account will now close the transaction and the item status will be set to Lost & Paid.
    - Adjust to Zero can be used by setting the Library Setting called “Use Lost and Paid copy status” to True.

### General Display Enhancements

- Filter display enhancement
  - This patch fixes a bug that prevented some interface filters from working as expected. This patch specifically affects combo box filters that allow users to type in a value to see a list of available values or options.
