Importing browser settings from Google Chrome to Microsoft Edge

1. Open the **Google Chrome browser** located on the desktop and make sure that your profile is signed in and synced.

To verify this, click on the profile icon Guest i at the top right and if sync is turned off click **Turn on sync**... (sign in with the email account you've used in the past)

8	Sync is off				
Turn on sync					

2. After you've signed in, a popup message with a Continue button displays. Click **Continue**. Another popup displays. Click **Yes**, **I'm in**..

- 3. Make sure your bookmarks and passwords are visible in the Google Chrome browser, and then **close** Google Chrome.
- 4. Click **New Evergreen Client** on your desktop to open Evergreen. You **may** get a popup window. If you do, click the **Confirm and Continue** button.

Click the **avatar icon** at the top right of the browser. Then click Settings (the gear icon):

5. Click Import browser data
